

TEMPERATURE SENSOR

type 293

SPECIFICATION

Application	temperature measurement of feed cylinders extruding presses and injection molds. The location marker enables orientation setting of the oval measuring tip.
Temperature range	0°C...+500°C
Measuring element	Fe-CuNi (J) NiCr-NiAl (K)
Class of thermocouple	2 ⁽¹⁾
Measuring junction	grounded ⁽¹⁾
Sheath material	steel 1.4541 ⁽¹⁾

⁽¹⁾ Other parameters according to customer requirements

⁽²⁾ Other sensor dimensions on demand

ORDERING CODE

TP — 293 — —

Measuring element J or K

Length of compensation cable L_k = 1, 2 or 3 m⁽¹⁾

Example for order:

TP-293J-3,0 thermocouple sensor Fe CuNi (J), length of compensation cable L_k = 3 m.
