

TEMPERATURE SENSOR WITH TRANSMITTER

type 995

Pt100 sensor with industrial connector (version with M12 connector available), is designed for temperature measurement of liquid, gases and solids in receptacles, ducts and pipelines.

The sensor has a built-in programmable transmitter which converts the sensor resistance change to a standard 4-20mA signal or voltage 0-10V. The transmitter is configured using a PC via **IF-2013U** interface (ordered separately). Parameters are set as in the case of transmitters **TEH-27** and **TED-27**, except for the type of processing element and its connection method.

SPECIFICATION

Temperature sensor

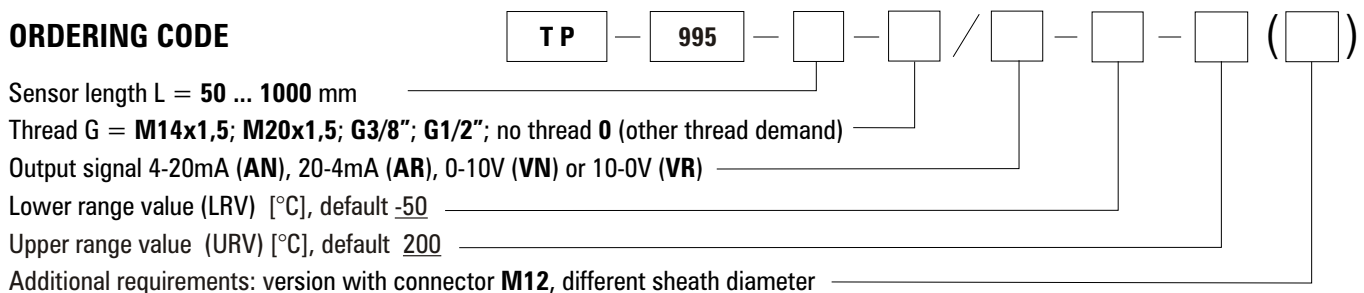

Temperature range	-50°C... +200°C
Measuring element	Pt100, class B (class A on demand)
Sheath and body material	steel 1.4541
Maximum operating pressure	1,6 MPa
Protection class	IP65
Thread G	M14x1,5; M20x1,5; G3/8"; G1/2" (other on demand)
Additional accessories	thermowell with male thread or for welding (ordered separately)

Measurement transmitter

Measuring range	programmable, maximum -50°C ... +200°C (URV-LRV ≥ 30°C)			
Accuracy (Ta = 23°C)	0,2°C			
Thermal drift (dependent on Ta)	0,01°C/°C			
Output signal, programmable	TP-995/AN	TP-995/AR	TP-995/VN	TP-995/VR
Linear region of output signal	4-20mA or 20-4mA		0-10V or 10-0V	
Sensor failure indication, programmable	3,8 ... 20,5mA		0 ... 10,3V	
Power supply	3,5 or 23mA		0 or 11,5V	
Output signal delay after power on	8 ... 36VDC/24mA (from current loop)		14 ... 36VDC/18mA	
Digital filter time constant (1st order filter)	ca. 5s			
Connector and body operating temperature Ta	selected: 0,2; 1; 2; 4; 8; 16 or 32s			
	-40 ... +80°C			

Default values are underscored. Factory programmed in case of the incomplete ordering code.

ORDERING CODE

Example for order: TP-995-200-G1/2"/AN-0-150 temperature sensor of length L=200mm, with thread G1/2" with built-in transmitter for output signal 4-20mA and measuring range 0...150°C.

On request, free Quality Certificate specifying the sensor class or payable Calibration Certificate for any temperature with marked deviations
